

BTN1-0040

High Power Bias Tee

DEVICE OVERVIEW

General Description

The BTN1-0040 is constructed using a custom-made, resonance-free conical inductor to achieve extremely broadband performance. By minimizing the overall inductor size and using proprietary packaging techniques, the BTN1-0040 is a superior option in terms of performance, reliability and ease-of-use when compared to cumbersome user-designed bias tees employing off-the-shelf conical inductors. The extremely low cutoff and resonance free operation makes the BTN1-0040 suitable for biasing amplifiers, lasers, and modulators driven with high frequency data patterns.

Features

- Broadband: 500 kHz to 40 GHz
- Low Insertion Loss
- High Power
- Non-Resonant
- Compact Size

Time Domain Plot

Oscilloscope measurements of the BTN1-0040 with a 10Gb/s PRBS pattern. Eye diagrams are taken with a $2^{31}-1$ PRBS input demonstrating minimal eye distortion/closure afforded by the extremely low frequency operation of the bias tee.
