

Conflict Minerals Compliance Statement

September 10, 2025

To our Valued Customers,

Marki Microwave is committed to assist our customer in fulfilling their obligation to comply with all reporting requirements. To that end, we are aware of the legislation passed by the United States Congress in July of 2010 that requires corporations to report the use of "Conflict Minerals" in the products they manufacture. The minerals in question are Tantalum (Ta), Tin (Sn), Gold (Au) and Tungsten (W).

Marki Microwave products *may contain* the elements Tantalum, Tin, Gold and/or Tungsten. However, statements from our suppliers are on file attesting that *none* of the materials they supply to Marki Microwave were knowingly sourced from the Democratic Republic of Congo or the surrounding Conflict Regions.

Please email any questions to sales@markimicrowave.com.

Sincerely,

A handwritten signature in black ink that reads "Terrance Stebbins". The signature is written in a cursive, flowing style.

Terrance Stebbins
