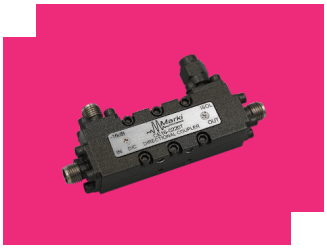
CE16-0220T

Elite 2 - 20 GHz Directional Coupler

DEVICE OVERVIEW

General Description

The CE16-0220T is a next generation broadband 2GHz to 20GHz, 16dB directional coupler from the Marki Elite Series. Conductive paint is applied to all Elite Series products to reduce EMI/RFI leakage and susceptibility. The CE16-0220T offers the best directivity, return loss, and coupling accuracy available on the market. Available as a three port directional coupler with included 50Ω termination on the isolated port, the CE16-0220T is an exceptional choice for broadband return loss measurements, power leveling, and signal monitoring applications. Sophisticated neural network design techniques combined with deep circuit knowledge and triplate stripline construction allow the Marki Elite Series of Couplers to provide superior performance to all other directional couplers available.



Features

- Broadband Performance
- Excellent Coupling Flatness
- High Directivity

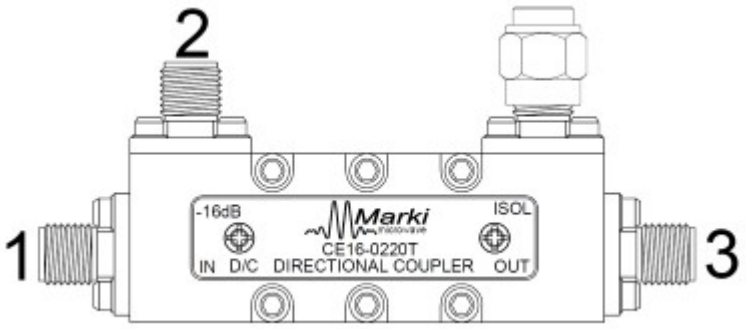
Port Configuration and Functions

Port Diagram

A side view of the CE16-0220T package outline drawing is shown below. The CE16-0220T has input and output ports given in Port Functions. The CE16-0220T can be used in the forward direction by configuring the coupler with the input signal into port 1, using port 2 for coupled port, and port 3 for output port.



Port Functions

Port	Function	Connector Type	Description	DC Equivalent Circuit
Port 1	Forward Power Input and Reflected Power Output	2.92F	The input port is DC short to the output port and open coupled port.	Port 2	Coupled	2.92F	The coupled port is DC open to the input and output ports.	Port 3	Forward Power Output And Reflected Power Input	2.92F	The output port is DC short to the input port and open coupled port.

[1] Amplitude Flatness = Median value of ABS(Measured Coupling Power – Average Coupling Factor).
[2] Coupling loss based on average coupling factor.
[3] Excess Insertion Loss = (Input Port to Output Port Insertion Loss) – Coupling Loss.
[4] IL Corrected Directivity = Directivity + Insertion Loss.
